

ALIGNMENT BALL

user manual

Thank you for purchasing an Alignment Ball.
Read this manual will take you less than 3 minutes
and will improve a lot your practice sessions.

If you need the manual in a different language
you can scan the QR code below to download
it directly from our website.

WHAT'S IN THE BOX

1 Alignment Ball / 1 net / 1 user manual

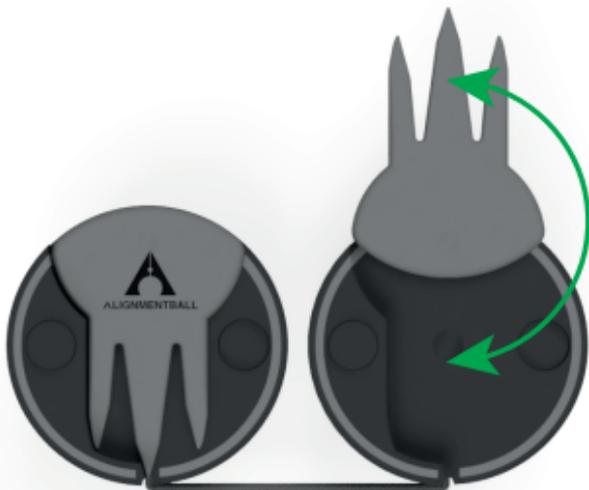

MAGNETIC
opening

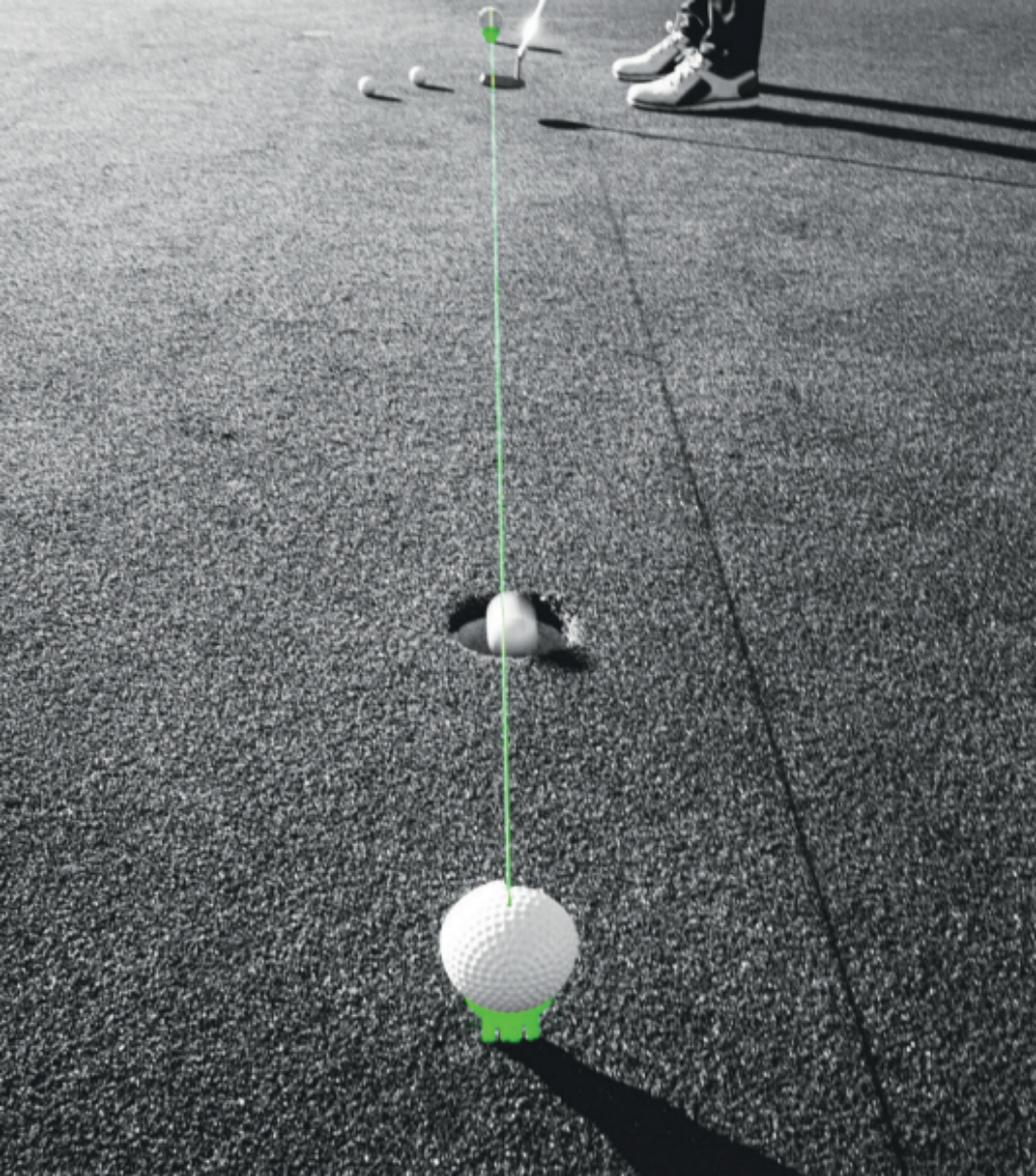

5 METRES
string

AUTOMATIC
winder

TO REVEAL THE SUPPORTS

Twist it until you hear "click" to open & close

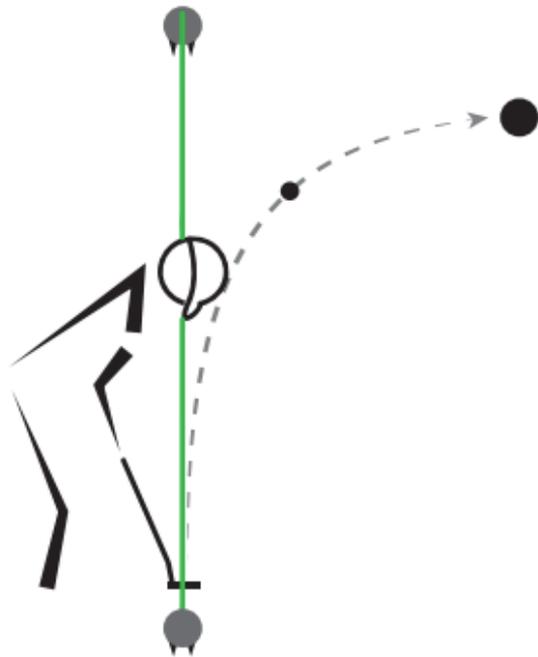

Straight Putt

Put the ball centered underneath the string.
It shows you the line to roll the ball into the hole.

Putt with slope

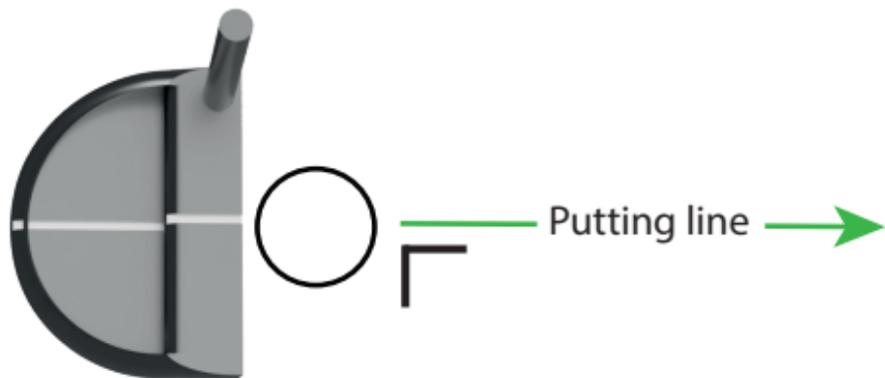

Considering the slope, set up the alignment ball on the line that you would like your ball start on. It is your aiming point. Find the right balance between the speed and the line and repeat it to gain confidence.

Tips from the pros

- . Always center the golf ball underneath the putting line.
- . Square your putting face to your putting line.

- . Use the alignment ball placed behind the hole as a marker of security distance not to exceed in the event of a missed putt.

ALIGNMENT AID

The Alignment Ball is the perfect accessory to ensure you are properly lined up when practicing.

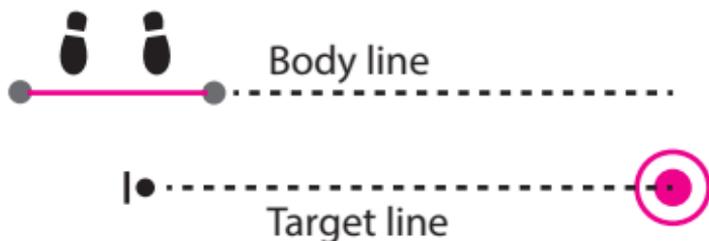

You can use it on both grass and driving range mat.

You can use it to visualize your body alignment, club face or swing path.

The main advantage over the alignment stick is that it will not move when you hit or place a new ball. Now you can really focus on what you are working on.

ALIGNMENT BASICS

There are two different lines in basic alignment:
your body (including your feet, hips and
shoulders) and your target line.

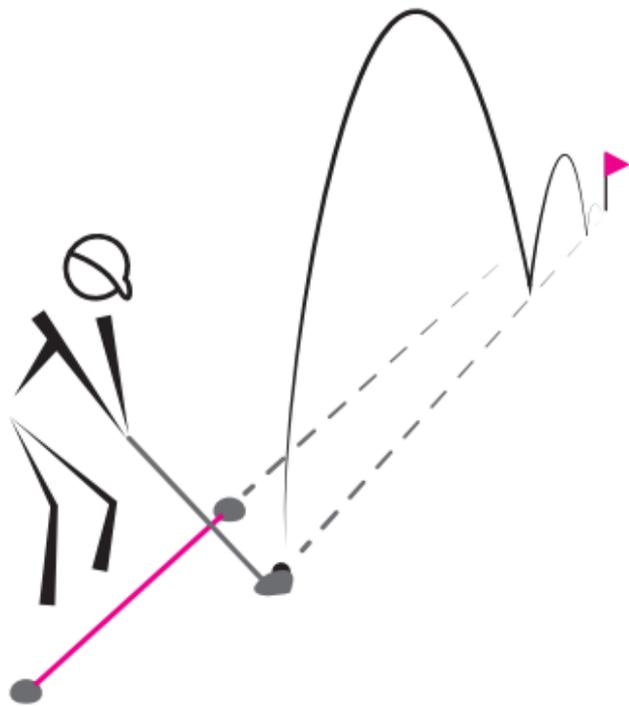

To help you visualize this, you can imagine
a railroad track. Your club face points to
your target while your body alignment
is parallel to that target line.

SINGLE LINE

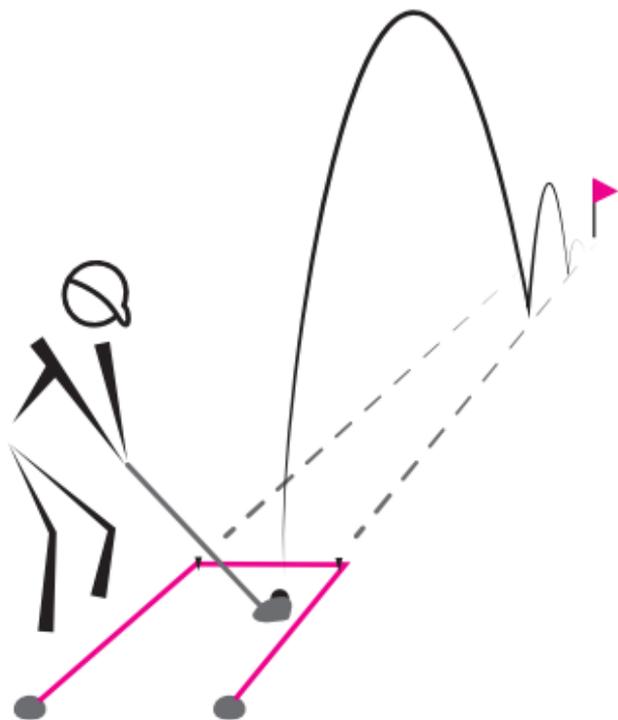

Extend on both side of the mat depending on your target, or simply drop it or stick it into the ground.

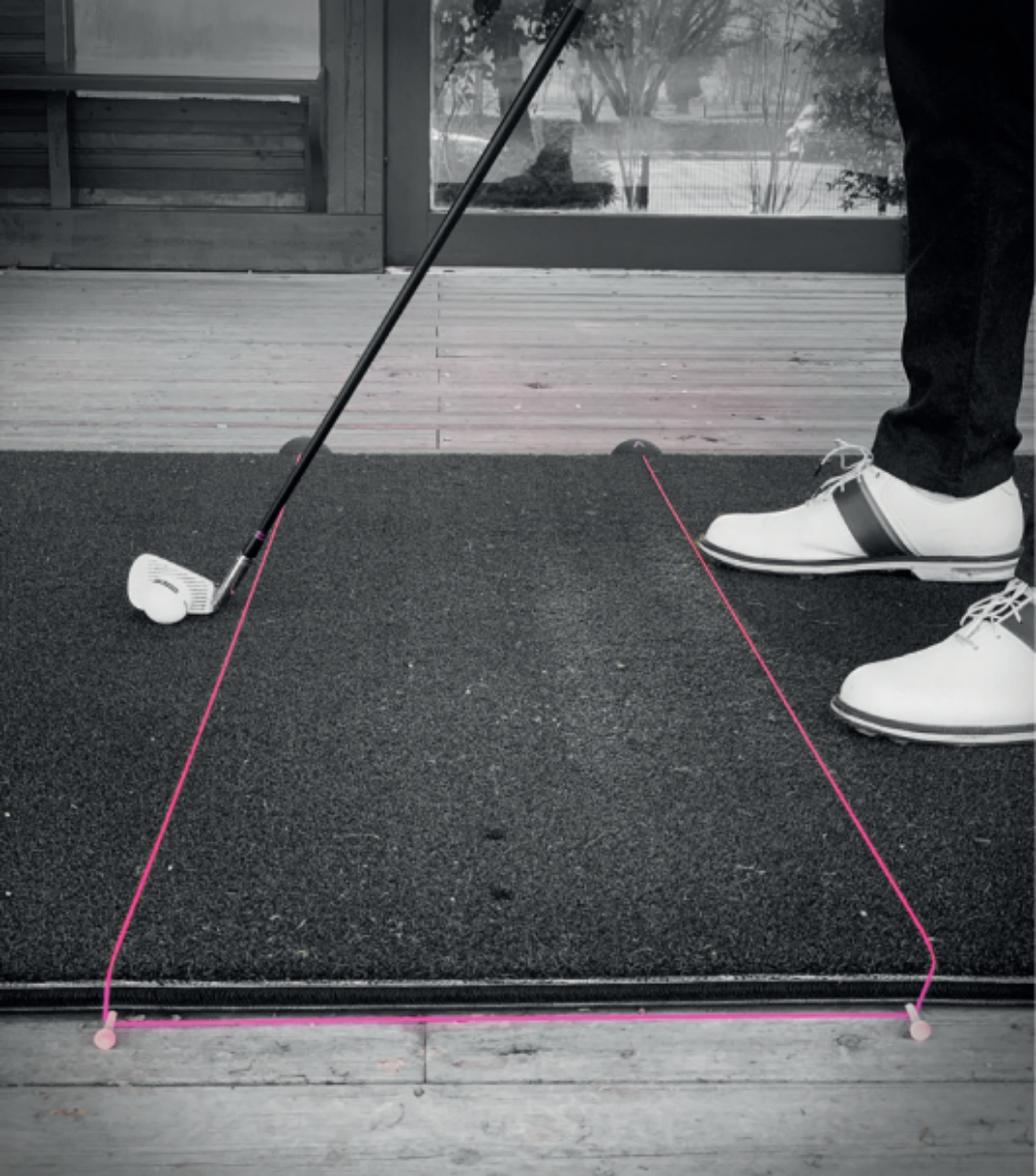

And that's it. Now you have a stable mark to be sure to be properly line up for every shot.

DOUBLE LINE

With the help of two tees, stick into the ground or slide under the mat, you can practice with a double line. One for your body alignment and one for your club face orientation.

BALL FLIGHT TIPS

The draw:

To draw means the ball will start right of the target and then curve back to the left.

Set up:

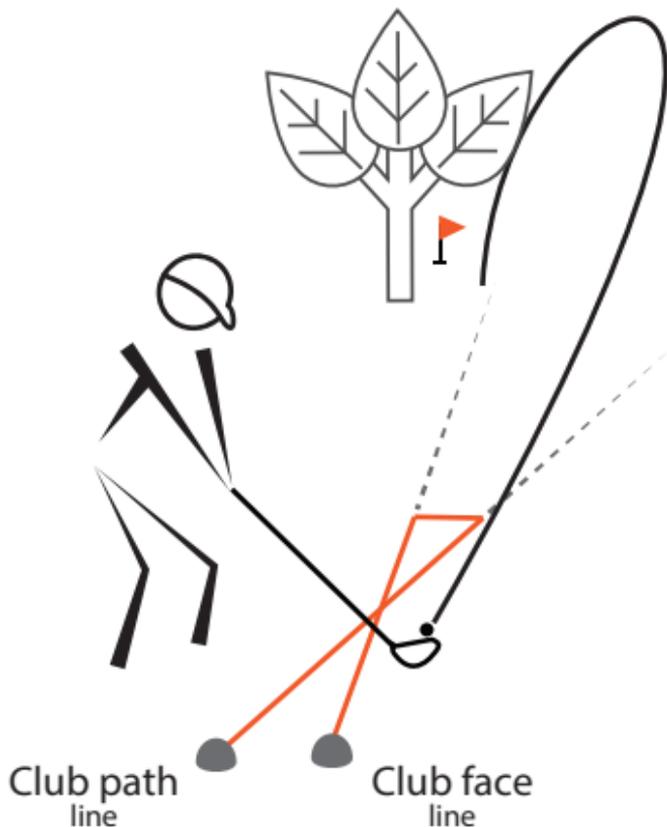

Club face: aiming slightly right of the target

Body line: pointing on the right of the target

Club path: inside - outside the target line

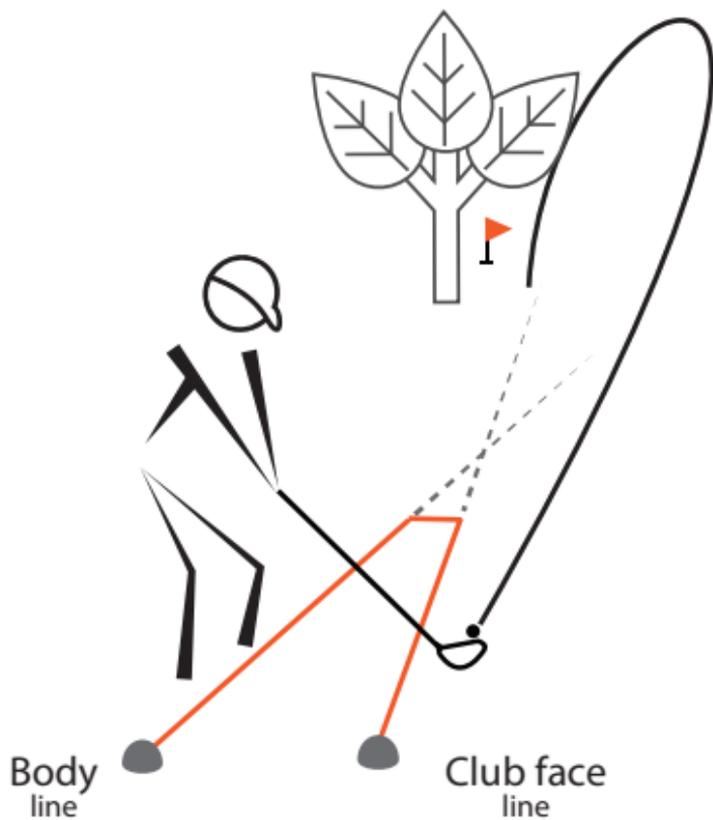

DRAW SET UP

Club face + club path set up

BALL FLIGHT TIPS

The fade:

To fade means the ball will start left of the target and then curve back to the right

Set up:

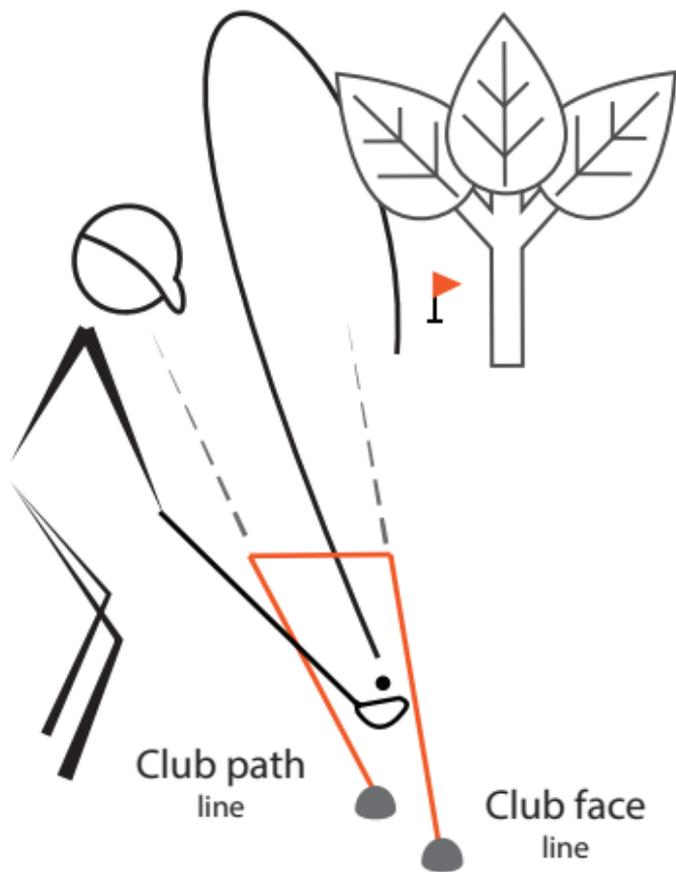

Club face: aiming slightly left of the target

Body line: pointing on the left of the target

Club path: outside-inside the target line

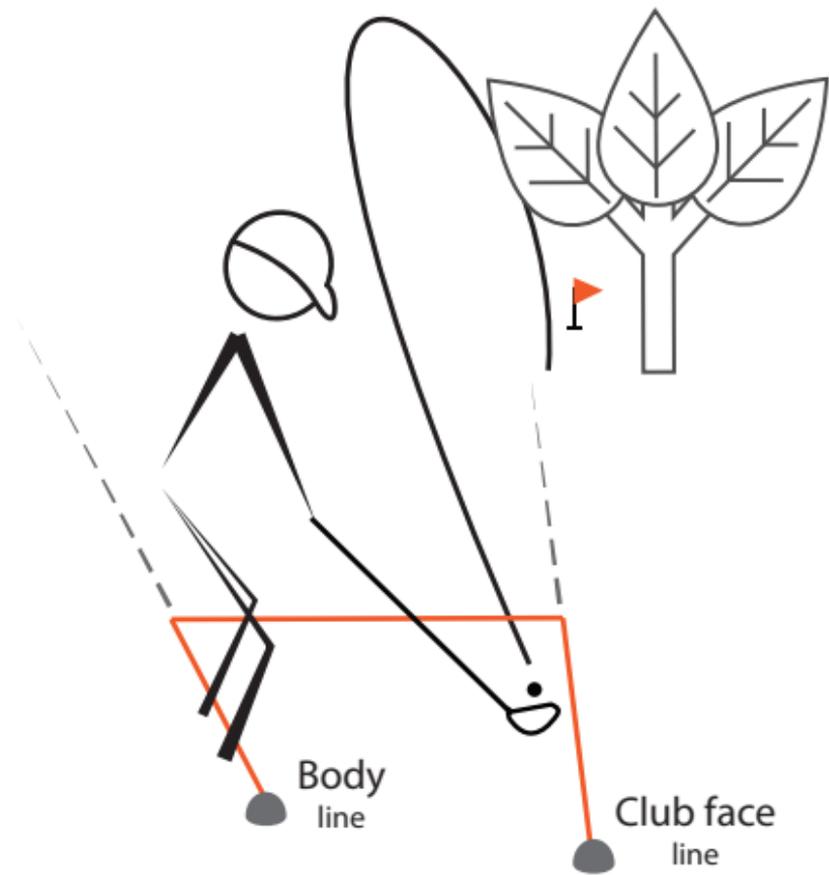

FADE SET UP

Club face + club path set up

CONTACT AID

The attack angle is the angle at which you contact the ball. You can set up the Alignment Ball to visualize the perfect attack angle and have great contact.

With an iron, visualize hitting down on the ball.

CONTACT AID

With a driver, visualize hitting up on the ball.
